PARTS & COMPONENTS

G.W. Becker, Inc.'s mechanical parts are precision-engineered and manufactured to offer the most reliable product available. While previous suppliers might offer an initial savings, they are often with cheap mechanical parts. You are only lowering the performance and reliability of your equipment. Ours provide the durability you need because we only offer parts exclusively for overhead traveling cranes.

We have our own Fabrication and Machine Shop to custom fit for your exact needs!

As important as purchasing overhead crane products and accessories is, choosing the right service provider to work with is equally as important to help maintain the quality and longevity of your product. Our service technicians have the unique advantage of being specialists to our products. They know the ins and outs of all our product offerings, and therefore become experts at diagnosing and fixing any issues you might encounter. Our dedicated staff, and over 40 years of experience, gives us the expertise to assist our customers with any and all overhead material handling needs.

We supply replacement parts for all makes and manufacturers of overhead electric traveling cranes — not only G.W. Becker cranes. Our parts support monorail systems, jib cranes, and both electric and air-operated wire rope and chain hoists.

We also provide components for crane electrification systems, pendant control stations, and radio control systems, along with control parts for both AC and DC crane systems.

In addition, we offer replacement brake parts for modern brake systems as well as components for older or obsolete brake designs.
