

G.W. Becker, Inc. is a distributor of a full line of crane related products and accessories. We have numerous vendor relationships that help you keep your serviceable overhead cranes operating at peak efficiency.

We are also the exclusive distributor of Meco-Matic, GH&W, McDowell-Wellman, Wason Crane, and Mark Crane parts. Additionally, our G.W. Becker, Inc. team provides reverse engineering services to accommodate parts and/or components that are difficult to locate.

INDUSTRIES SERVED:

- Aeronautical
- Aluminum
- Automotive
- Bearing
- Chemical
- Concrete
- Construction
- Defense
- Fabrication
- Food
- Forging
- Foundries
- Glass
- Heavy Machinery
- Machining
- Mining
- Oil & Gas
- Paper
- Plastic
- Pipe
- Rail
- Specialty Metals
- Steel – Primary Producers
- Steel – Secondary Processors
- Tool & Die
- Trucking
- Tube
- Utilities
- Warehousing
- Water Treatment

IN-HOUSE MECHANICAL SURPLUS PARTS

SHANK HOOKS

Available 3/4 to 300 tons.
 Load Rating code stamped on each hook.
 Quenched and Tempered.
 Available in carbon steel, alloy steel and bronze.
 Proper design, careful forging and precision controlled quench and tempering give maximum strength without excessive weight and bulk.
 Every Shank Hook has a pre-drilled cam which can be equipped with a latch.
 Finished Machining Available – Special Block Configurations – Hook Threading – Nut ready for easy assembly with pre-drilled locking pin hole.
 Also Available are Custom Built Heavy Duty Safety Latches & Thrust Bearings.

LOAD BLOCKS

The most complete line of load blocks for hoisting.
 Custom manufactured wire rope load blocks to fit your lifting requirements; sheave configuration, capacity and reeving.
 Forged hook with safety latch.
 Machined steel sheaves.
 Welded steel construction.
 Roller bearings for smooth rotation.
 Lubrication fittings for hook and sheave bearings.

BRAKE WHEELS

A wide variety of wheels for most sizes and types of braking systems including hydraulic, electrical, and mechanical.
 Non-standard size wheels, wheels made with carburized steel, and brake wheel couplings are also available.
 Manufactured from ductile-iron and wears smoothly and evenly.
 Completely machined to provide proper balance at normal speeds.
 Resistant to scoring.
 Good compatibility with friction materials.
 Semi-finished with rough pilot bore.

SHEAVES

The most complete line of sheaves for hoisting.
 Custom machined wire rope sheave to your desired measurements or OEM Specifications.
 Manufactured sheaves starting from Grey Iron Castings and from Billets of 4130, 4140 or 4145 Heat Treated Material.
 We have our own fabrication and machine shop to custom fit your exact needs. We provide manufactured products and services with our own in-house precision machine shop and engineering department to offer design, fabricating, machining and assembly.

CRANE WHEELS

Manufactured from carbon or alloy steels.
 Available in a wide range of standard sizes and non-standard size wheels are also available.
 Available in any surface hardness up to 60 Rc.
 Also able to be Deep Hardened.
