

G.W. Becker, Inc. designs and builds reliable material handling equipment for our valued customers

G.W. Becker, Inc. cranes meet the demands of our customers with competitive pricing, delivery and value.

G.W. Becker, Inc. provides engineering skills, engineered products, a complete spectrum of distributor products, and inspection/repair expertise with emphasis on preventive maintenance.

Your Single Source Provider for Overhead Crane Products & Services

OVERHEAD CRANES

Double Girder Cranes:

- Capacities up to 200 Ton
- Spans up to 150 ft
- Up to CMAA Class "F"
- Hot metal application avail.

Benefits

- High hook capability
- Ideal for high speeds
- Ideal for heavy service

Single Girder Cranes:

- Capacities up to 15 Ton
- Spans up to 125 ft
- Up to CMAA Class "C"
- Patented Track

Benefits

- Cost effective
- Low headroom

Gantry Cranes

Freestanding Runway Systems

HOISTS

GWBI Standard - Top-Running Wire Rope

Packaged - Top-Running Wire Rope

- Designed for CMAA Class 'D' & 'E' Service
- Capacities up to 75 tons
- Precision built-up style hoist in a pre-engineered package platform
- Designed per CMAA Specifications
- Customizable in gauge, lift, speed.
- Leading feature is our powerful gear case
- Engineered with standardized componentry

Electric Chain

Monorail Electric Wire Rope

Manual Chain

Ratchet

SERVICE

- 24-hour emergency service
- Expert maintenance and repair by trained and certified technicians
- Preventive maintenance
- All welders certified to AWS D1.1 and 14.1
- Crane modernizations
- Self-performing crane and runway installation/removal
- Runway surveys and inspections
- Hoist inspection and warranty repair service

INSPECTIONS

Inspection services for all makes and models of overhead cranes, hoists, and below-the-hook devices. Our frequent, periodic and maintenance inspections provide you with a report on your crane and hoist equipment, allowing you to plan maintenance and repairs to keep your equipment operating efficiently, reliable, and safely.

- Frequent inspection - daily to monthly intervals
- Periodic inspection - 1 to 12-month intervals
- Trained and certified overhead crane inspectors
- Mobile electronic reporting tool
- OSHA compliant periodic and frequent inspection reports
- Magnetic particle and dye penetrant non-destructive testing

PARTS

Parts for all makes and models
Yale-Shawbox Master Parts Distributor
Factory Authorized Service Center
